Director
Smile USA®

Message from Director

"We invite you to participate in the Masters clinical series presented by Smile USA®. The faculty has been selected based on their proficiency in multi-disciplinary approach. Learn from their vast experience & expertise.

The faculties who teach are experts in their field and they will not hold back information. Instead their main goal is to make sure you get what you deserve with unbiased, fair, non-commercial, sound knowledge upon which you will build your career dreams in cosmetic dentistry."

Dr. Saeisha Mistry BDS MS

A leading Aesthetic and Restorative Dentist from Mumbai, India. She graduated from the Government Dental College and Hospital Bombay in 1991. She completed her Post Graduation with a Master's Degree in Conservative Dentistry from the Eastman Dental Hospital, London in 1995. After having established a successful restorative practice in Mumbai India, she obtained a Diploma in Advanced Aesthetics from Rosenthal Institute of Aesthetic Dentistry, New York University.

Dr. Mistry currently maintains a private practice, which is limited to Aesthetic and Restorative Dentistry with special emphasis on smile make-over, implants and oral reconstructions. Dr. Mistry is a member of the American Academy of Implant Dentistry and an accredited member of the Indian Academy of Aesthetic and Cosmetic Dentistry.

Dr. Mistry has published articles in various journals and newsletters, and has presented numerous lectures, hands-on workshops, and continuing education courses in various aspects of Aesthetics, Implants and Restorative Dentistry in India and Internationally.

ABOUT OUR COURSE

This comprehensive lecture will teach you the essentials for facial aesthetics and smile designing.

Increased awareness of appearances and aesthetics has changed the dynamics of today's dental patients. Contemporary treatments are not considered successful unless the final outcome is not only functional but also aesthetic. As a result, an Aesthetic Analysis or a Smile Design has become integral to every treatment plan.

In order to create aesthetics for an individual it is essential to personalize the persons smile with the lips and face. Thus merely treating the teeth is not enough, but we must look at Facial Aesthetics from a global perspective and integrate the teeth with the smile to enhance the face.

Composite Resins are the most versatile of restorative materials available for making minor or major changes in a dental appearance. They can be used to enhance and design a smile while giving the dentist full control of the desired outcome using his artistic expression in the overall smile design. The proper techniques can ensure the function and longevity of the smile design.

COURSE OBJECTIVES

At the end of the course you will have a better understanding on how to use composite veneers to translate your smile design into a captivating smile.

DEMONSTRATIONS AND HANDS ON SESSIONS

- Preparation for a Composite Laminate
- Step-by-step technique involving color selection
- Layering the composite using different opacities in different areas of the tooth
